Good News!!!

The ecoEnergy Grant Program just got better.

As part of the Government of Canada's Economic Action Plan, an additional 300 million dollars is being invested in the Eco Energy Retrofit Homes program. Effective immediately the Federal Grant for replacing windows has been increased from \$30.00 to \$40.00. Combined with the Provincial Grant, homeowners now get a total rebate of \$70.00 per opening.

This, combined with the current tax credit program of up to \$1350.00, makes now the best time to invest in new energy efficient windows and doors.

Please note: To facilitate the Audit process for the ecoEnergy Grant Program we have started to label each window showing the zones in which they qualify. These stickers can be found on our existing North Star label. Please keep all labels for the inspector for final audit completion.

For more information on the ecoEnergy Grant Program visit, www.ecoaction.gc.ca.
