SENTINEL™ ENTRY DOOR SYSTEM

At North Star, we believe the entrance to your home should offer more than just curb appeal — it should stand as a lasting symbol of security, craftsmanship, and design.

The Sentinel Entry Door System™ reflects our unwavering commitment to quality, blending strength and style to safeguard what matters most. With a robust, weather-resistant composite frame built to withstand the elements, the Sentinel system ensures long-term protection and performance.

1. COMPOSITE FRAME CONSTRUCTION

In partnership with the University of Waterloo, the Sentinel Entry Door System proved significantly more resistant to water penetration than standard wood frames. Its composite frame offers superior rigidity and strength, minimizing warping, bowing, and twisting for long-lasting performance.

2. COMPOSITE SELF-DRAINING SILL

Built-in reservoirs redirect water away from the home, adding protection against harsh North American weather. Made from durable composite materials, the sill offers a strong, stable surface for high-traffic, moisture-prone areas.

3. CONTINUOUS WEATHERSTRIPPING

A seamless and uninterrupted seal prevents water and air infiltration, reducing noise and maintaining indoor comfort.

4. TOP-TO-BOTTOM PERFORMANCE

A single in-swing achieves an impressive Performance Grade of 55 in structural performance through the NFRC — equivalent to the force of a category 4 hurricane with wind speeds of 246 km/h or 153 mph.

5. POLYURETHANE FOAM CORE

Our fiberglass slab's high-density, CFC-free polyurethane foam core delivers exceptional insulation, energy efficiency, sound dampening, and dent resistance — achieving an R-8 rating.

6. RIGID & PROTECTIVE SWEEP

The Sentinel sweep is comprised of an automotive-grade synthetic rubber that can withstand temperatures reaching as low as -40° C and as high as +82° C (180° F) for an insulative and weather-resistant seal.

7. TWO FRAME TEXTURES

Choose between two distinct frame textures to match your style — a sleek, smooth finish for a modern look or a high definition woodgrain that replicates the organic grain of wood. The Sentinel Entry Door System offers both options in durable composite materials.

Uno 6'8" Entry Door — 22 x 12 Edge Sandblasted Glass

STEEL

Steel door slabs provide strength, security, and a sleek finish, making them a durable and cost-effective choice. Resistant to cracking and warping, they offer clean lines and can be painted for a customized look. Steel doors also deliver excellent insulation, enhancing energy efficiency while standing up to harsh weather conditions.
